ELSEVIER

Agricultural Water Management 46 (2001) 285–304

Agricultural water management

www.elsevier.com/locate/agwat

Cumulative Subject Index, Volumes 42–46

Acala cotton
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Acid sulfate soils
An integrated drainage network analysis system for agricultural drainage management. Part 2: the application, 45 (2000) 87
Soil and water indicators for optimal practices when reclaiming acid sulphate soils in the Plain of Reeds, Viet Nam, 45 (2000) 127
Water management for rice cultivation on acid sulphate soils in the Plain of Reeds, Vietnam, 46 (2000) 91

Adequacy
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

Advance-infiltration variability
A furrow irrigation model to improve irrigation practices in the Gharb valley of Morocco, 42 (1999) 65

Aerodynamic resistance
Modelling surface resistance from climatic variables? 42 (2000) 371
Crop water requirements model tested for crops grown in Greece, 45 (2000) 297

AGNPS
Calibration and validation of a non-point source pollution model, 45 (2000) 17

Agricultural drainage
An integrated drainage network analysis system for agricultural drainage management. Part 2: the application, 45 (2000) 87

Agricultural policy
The impact of water-pricing policy in Spain: an analysis of three irrigated areas, 43 (2000) 219

Agroforestry
Characterisation of hydrogen isotope profiles in an agroforestry system: implications for tracing water sources of trees, 45 (2000) 229

Agronomic practices
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 2. Recharge control by agronomic practices, 42 (1999) 237

Almond tree
Water balance in a young almond orchard under drip irrigation with water of low quality, 43 (2000) 75

Alternate
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Alternate crops
Water use in a modified summer fallow system on semiarid northern Great Plains, 43 (2000) 345

Analytical solution
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169

Bed cultivation
A comparison of soil-water distribution under ridge and bed cultivated potatoes, 42 (1999) 189

Bentazone
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21

PII: S0378-3774(00)00133-5

Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119
Modelling ethoprophos and bentazone fate in a sandy humic soil with primary pesticide fate model PRZM-2, 44 (2000) 317
Modelling pesticide leaching in a sandy soil with the VARLEACH model, 44 (2000) 357

Bi-level drainage
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169

Biomass
Assessment of a crop growth-water balance model for predicting maize growth and yield in a subtropical environment, 46 (2000) 157

Boussinesq equation
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169

Broadbean
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Bromide
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135

Bromide ion
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21

Calcareous soils
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143

Calibration
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153

Canopy resistance
Crop water requirements model tested for crops grown in Greece, 45 (2000) 297

Cantaloupe
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Channel routing
Modeling water balance components and irrigation efficiencies in relation to water requirements for double-cropping systems, 46 (2000) 167

Clay soils
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85
CRACK-NP: a pesticide leaching model for cracking clay soils, 44 (2000) 183

Cluster analysis
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Computer model
Using the IRMOS model for diagnostic analysis and performance enhancement of the Rio Cobre Irrigation Scheme, Jamaica, 45 (2000) 185

Conjunctive use
Groundwater management for Lower Indus Basin, 42 (2000) 273

Contamination
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Controlled drainage
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111
Influence of water table management on corn and soybean yields, 46 (2000) 73

Conventional
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Conventional with cutback
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water

use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Correlation model
A geostatistical approach to optimize the determination of saturated hydraulic conductivity for large-scale subsurface drainage design in Egypt, 42 (2000) 291

Cost recovery
A cost recovery model for tertiary canal improvement projects, with an example from Egypt, 43 (2000) 29

Cotton
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Cracked clay soils
Evaluating pesticide leaching models: the Brimstone Farm dataset, 44 (2000) 75

CRACK-NP
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85

Crop coefficients
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Crop ET
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41

Crop factors
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Crop growth rate
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. II. Shoot growth, nitrogen uptake and water extraction, 46 (2000) 15

Crop management
The influence of early sowing of wheat and lupin crops on evapotranspiration and evaporation from the soil surface in a Mediterranean climate, 42 (1999) 205

Crop production
Rainfall harvesting using sand ditches in Jordan, 46 (2000) 183

Crop rotation
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 1. Experiments and model calibration, 42 (1999) 219
Water use in a modified summer fallow system on semiarid northern Great Plains, 43 (2000) 345

Crop salt tolerance
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Crop transpiration
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157

Crop water requirements
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Crop yield
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Cropping intensities
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Cropping pattern
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239

Cultivation techniques
Evaporation losses from bare soils as influenced by cultivation techniques in semi-arid regions, 42 (2000) 355

DAS
Comparative evaluation of three-crop growth models for the simulation of soil water balance in oilseed Brassica, 42 (1999) 29

Data set
The Weiherbach data set:. An experimental data set for pesticide model testing on the field scale, 44 (2000) 43

Decision support
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243

Decision support system
An econometric irrigated crop allocation model for analyzing the impact of water restriction policies, 42 (1999) 47

Deficit irrigation
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. I. Grain yield and yield components, 46 (2000) 1
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. II. Shoot growth, nitrogen uptake and water extraction, 46 (2000) 15
Effect of deficit irrigation on wheat and opportunities of growing wheat on residual soil moisture in southeast Zimbabwe, 46 (2000) 111

Diagnostic analysis
Using the IRMOS model for diagnostic analysis and performance enhancement of the Rio Cobre Irrigation Scheme, Jamaica, 45 (2000) 185

Dielectric sensors
A comparison of soil-water distribution under ridge and bed cultivated potatoes, 42 (1999) 189

Diet
Nutritional water productivity and diets, 45 (2000) 275

District
A case study for irrigation modernisation. I. Characterisation of the district and analysis of water delivery records, 42 (2000) 313
A case study for irrigation modernisation: II. Scenario analysis, 42 (2000) 335

Drain discharge
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169

Drainage
Comment on the paper "An analytical solution for design of bi-level drainage systems" by A.K. Verma, S.K. Gupta, K.K. Singh, H.S. Chauhan, 46 (2000) 193
Assessment of drip and flood irrigation on water and fertilizer use efficiencies for sugarbeets, 46 (2001) 241

Drainage benefits
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Drainage costs
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Drainage feasibility
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Drainage flow
Gleams model application on a heavy clay soil in Finland, 43 (2000) 285

Drainage network
An integrated drainage network analysis system for agricultural drainage management. Part 1: the system, 45 (2000) 73

Drainage water reuse
Impacts of gypsum and winter cover crops on soil physical properties and crop productivity when irrigated with saline water, 45 (2000) 55

Drainflow
Evaluating pesticide leaching models: the Brimstone Farm dataset, 44 (2000) 75

DRAINMOD testing
Analysis of DRAINMOD performances with different detail of soil input data in the Veneto region of Italy, 42 (2000) 259

Drainwater re-use
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239

Drip
Soil water and temperature regimes in drip and sprinkler irrigation, and implications to soybean emergence, 43 (2000) 15

Drip irrigation
Water balance in a young almond orchard under drip irrigation with water of low quality, 43 (2000) 75
Assessment of drip and flood irrigation on water and fertilizer use efficiencies for sugarbeets, 46 (2001) 241

Drop size
Digital image processing for determining drop sizes from irrigation spray nozzles, 45 (2000) 159

Durum wheat
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Econometric model
An econometric irrigated crop allocation model for analyzing the impact of water restriction policies, 42 (1999) 47

Economics
A cost recovery model for tertiary canal improvement projects, with an example from Egypt, 43 (2000) 29

Efficiency
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263

Egypt
A cost recovery model for tertiary canal improvement projects, with an example from Egypt, 43 (2000) 29

Electromagnetic induction
Salt distribution in the Senegal middle valley. Analysis of a saline structure on planned irrigation schemes from N'Galenka creek, 46 (2001) 201

England and Wales
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203

Environmental economics
The impact of water-pricing policy in Spain: an analysis of three irrigated areas, 43 (2000) 219

Episodic recharge
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 1. Experiments and model calibration, 42 (1999) 219
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 2. Recharge control by agronomic practices, 42 (1999) 237

Equity
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

Erosion
Gleams model application on a heavy clay soil in Finland, 43 (2000) 285

Ethoprophos
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21
Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119
Modelling ethoprophos and bentazone fate in a sandy humic soil with primary pesticide fate model PRZM-2, 44 (2000) 317
Modelling pesticide leaching in a sandy soil with the VARLEACH model, 44 (2000) 357

Evaporation losses
Evaporation losses from bare soils as influenced by cultivation techniques in semi-arid regions, 42 (2000) 355

Evapotranspiration
The influence of early sowing of wheat and lupin crops on evapotranspiration and evaporation from the soil surface in a Mediterranean climate, 42 (1999) 205
Modelling surface resistance from climatic variables? 42 (2000) 371
Water stress during different sugarcane growth periods on yield and response to N fertilization, 43 (2000) 173
Distributed agro-hydrological modeling of an irrigation system in western Turkey, 43 (2000) 183
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169
Crop water requirements model tested for crops grown in Greece, 45 (2000) 297

Computing the crop water production function for onion, 46 (2000) 29
Importance of water consumption by perennial vegetation in irrigated areas of the humid tropics: evidence from Sri Lanka, 46 (2001) 215
Comparison of sprinkler, trickle and furrow irrigation efficiencies for onion production, 46 (2001) 253

Evapotranspiration demand
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. I. Grain yield and yield components, 46 (2000) 1

Evapotranspiration estimation
Estimation of maize evapotranspiration under water deficits in a semiarid region, 43 (2000) 1

Fallowing
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 2. Recharge control by agronomic practices, 42 (1999) 237

Farm models
The impact of water-pricing policy in Spain: an analysis of three irrigated areas, 43 (2000) 219

Farmer's participatory role
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239

Farming practices
Impact of irrigation scheduling practices on pesticide leaching at a regional level, 43 (2000) 311

Fertigation
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Fertilizer management
Assessment of drip and flood irrigation on water and fertilizer use efficiencies for sugarbeets, 46 (2001) 241

Field experiment
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21
Solute transport in cinnamon soil: measurement and simulation using stochastic models, 46 (2000) 43

Field study
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263

Field-test
Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119

Food Production
Nutritional water productivity and diets, 45 (2000) 275

Fruit yield
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Furrow irrigation
A furrow irrigation model to improve irrigation practices in the Gharb valley of Morocco, 42 (1999) 65

Furrow irrigation method
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Genetic algorithm
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243

Gezira scheme
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

GIS
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203
An integrated drainage network analysis system for agricultural drainage management. Part 1: the system, 45 (2000) 73
An integrated drainage network analysis system for agricultural drainage management. Part 2: the application, 45 (2000) 87

***Glycine max* Merr.**
Influence of water table management on corn and soybean yields, 46 (2000) 73

Gravity-sprinkle
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51

Ground water
Comment on the paper "An analytical solution for design of bi-level drainage systems" by A.K. Verma, S.K. Gupta, K.K. Singh, H.S. Chauhan, 46 (2000) 193

Groundwater management model
Groundwater management for Lower Indus Basin, 42 (2000) 273

Groundwater recharge
The influence of early sowing of wheat and lupin crops on evapotranspiration and evaporation from the soil surface in a Mediterranean climate, 42 (1999) 205

Groundwater simulation model
Groundwater management for Lower Indus Basin, 42 (2000) 273

Heavy metals
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143

Heilonggang, China
Temporal and spatial soil water management: a case study in the Heilonggang region, PR China, 42 (1999) 173

Herbicide
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153
Economic weeding method for irrigated rice production in Bangladesh, 46 (2001) 267

Humid tropics
Importance of water consumption by perennial vegetation in irrigated areas of the humid tropics: evidence from Sri Lanka, 46 (2001) 215

Image processing
Digital image processing for determining drop sizes from irrigation spray nozzles, 45 (2000) 159

Infiltration
Soil water and temperature regimes in drip and sprinkler irrigation, and implications to soybean emergence, 43 (2000) 15

Initial soil salinity
Effect of initial soil salinity and subirrigation water salinity on potato tuber yield and size, 46 (2001) 231

Integrated water management
Integrated water management: emerging issues and challenges, 45 (2000) 217

Irrigated agriculture
The impact of water-pricing policy in Spain: an analysis of three irrigated areas, 43 (2000) 219

Irrigated farming
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Irrigated rice
Economic weeding method for irrigated rice production in Bangladesh, 46 (2001) 267

Irrigation
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143
A comparison of soil-water distribution under ridge and bed cultivated potatoes, 42 (1999) 189
A case study for irrigation modernisation. I. Characterisation of the district and analysis of water delivery records, 42 (2000) 313
A case study for irrigation modernisation: II. Scenario analysis, 42 (2000) 335
Water stress during different sugarcane growth periods on yield and response to N fertilization, 43 (2000) 173
Distributed agro-hydrological modeling of an irrigation system in western Turkey, 43 (2000) 183
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203
Alternate furrow irrigation for maize production in an arid area, 45 (2000) 267

Irrigation automation
Irrigation automation based on soil electrical conductivity and leaf temperature, 45 (2000) 145

Irrigation efficiencies
Modeling water balance components and irrigation efficiencies in relation to water requirements for double-cropping systems, 46 (2000) 167
Comparison of sprinkler, trickle and furrow irrigation efficiencies for onion production, 46 (2001) 253

Irrigation management
Using the IRMOS model for diagnostic analysis and performance enhancement of the Rio Cobre Irrigation Scheme, Jamaica, 45 (2000) 185
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243
Importance of water consumption by perennial vegetation in irrigated areas of the humid tropics: evidence from Sri Lanka, 46 (2001) 215

Irrigation scheduling
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327
Response of six vegetable crops to irrigation schedules, 45 (2000) 331
Development and testing of an irrigation scheduling model, 46 (2000) 121

Irrigation schemes
Salt distribution in the Senegal middle valley. Analysis of a saline structure on planned irrigation schemes from N'Galenka creek, 46 (2001) 201

Irrigation success
A cost recovery model for tertiary canal improvement projects, with an example from Egypt, 43 (2000) 29

Irrigation system
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

Irrigation water salinity
Effect of initial soil salinity and subirrigation water salinity on potato tuber yield and size, 46 (2001) 231

Irrigation water use efficiency
Comparison of sprinkler, trickle and furrow irrigation efficiencies for onion production, 46 (2001) 253

Isoproturon
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85

Land management
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Land reclamation
Soil and water indicators for optimal practices when reclaiming acid sulphate soils in the Plain of Reeds, Viet Nam, 45 (2000) 127

Leaching
Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153
Sources of error in model predictions of pesticide leaching: a case study using the MACRO model, 44 (2000) 247
Modeller subjectivity in estimating pesticide parameters for leaching models using the same laboratory data set, 44 (2000) 389

Leaching fraction
Agricultural practices, soil fertility management modes and resultant nitrogen leaching rates under semi-arid conditions, 42 (1999) 81

Leaching model
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263

LEACHP
Simulation of water and solute transport in field soils with the LEACHP model, 44 (2000) 225

Leaf area index
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 1. Experiments and model calibration, 42 (1999) 219
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. II. Shoot growth, nitrogen uptake and water extraction, 46 (2000) 15

Leaf–air temperature differential
Irrigation automation based on soil electrical conductivity and leaf temperature, 45 (2000) 145

Losses
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263

Losses of nitrate fertilizers
Agricultural practices, soil fertility management modes and resultant nitrogen leaching rates under semi-arid conditions, 42 (1999) 81

Lysimeter
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41

Lysimeter study
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263

Lysimeters
Lysimeter experiments with metolachlor in Tor Mancina (Italy), 44 (2000) 63
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135

MACRO
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85
Sources of error in model predictions of pesticide leaching: a case study using the MACRO model, 44 (2000) 247

Macropores
Evaluating pesticide leaching models: the Brimstone Farm dataset, 44 (2000) 75
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85
CRACK-NP: a pesticide leaching model for cracking clay soils, 44 (2000) 183
Simulation of pesticide leaching at Vredepeel and Brimstone farm using the macropore model PLM, 44 (2000) 307

Maize
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101
Assessment of a crop growth-water balance model for predicting maize growth and yield in a subtropical environment, 46 (2000) 157

Maize (Zea mays)
Estimation of maize evapotranspiration under water deficits in a semiarid region, 43 (2000) 1
Alternate furrow irrigation for maize production in an arid area, 45 (2000) 267

Malawi
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Management
A case study for irrigation modernisation. I. Characterisation of the district and analysis of water delivery records, 42 (2000) 313
An integrated drainage network analysis system for agricultural drainage management. Part 1: the system, 45 (2000) 73
An integrated drainage network analysis system for agricultural drainage management. Part 2: the application, 45 (2000) 87
Influence of water table management on corn and soybean yields, 46 (2000) 73

Maps
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203

Marketable yield
Response of six vegetable crops to irrigation schedules, 45 (2000) 331

Metolachlor
Lysimeter experiments with metolachlor in Tor Mancina (Italy), 44 (2000) 63
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135

Microirrigation
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Model
Sources of error in model predictions of pesticide leaching: a case study using the MACRO model, 44 (2000) 247
Assessment of a crop growth-water balance model for predicting maize growth and yield in a subtropical environment, 46 (2000) 157

Model calibration
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85
Modelling ethoprophos and bentazone fate in a sandy humic soil with primary pesticide fate model PRZM-2, 44 (2000) 317
Modeling pesticide dynamics of four different sites using the model system SIMULAT, 44 (2000) 337
Modelling pesticide leaching in a sandy soil with the VARLEACH model, 44 (2000) 357

Model evaluation
Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119

Model validation
A European test of pesticide-leaching models: methodology and major recommendations, 44 (2000) 1
Application of pesticide simulation models to the Vredepeel dataset. I. Water, solute and heat transport, 44 (2000) 105
Simulation of soil water, bromide and pesticide behaviour in soil with the GLEAMS model, 44 (2000) 201
Simulation of water and solute transport in field soils with the LEACHP model, 44 (2000) 225
Simulation of pesticide leaching at Vredepeel and Brimstone farm using the macropore model PLM, 44 (2000) 307
Modelling ethoprophos and bentazone fate in a sandy humic soil with primary pesticide fate model PRZM-2, 44 (2000) 317
Modelling pesticide leaching in a sandy soil with the VARLEACH model, 44 (2000) 357

Modeling
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111
Simulation of soil moisture content of a prairie field with SWAP93, 43 (2000) 139
Distributed agro-hydrological modeling of an irrigation system in western Turkey, 43 (2000) 183
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21
Testing PESTLA using two modellers for bentazone and ethoprophos in a sandy soil, 44 (2000) 283
Modeller subjectivity in estimating pesticide parameters for leaching models using the same laboratory data set, 44 (2000) 389
Development and testing of an irrigation scheduling model, 46 (2000) 121

Modeller subjectivity
Testing PESTLA using two modellers for bentazone and ethoprophos in a sandy soil, 44 (2000) 283

Modernisation
A case study for irrigation modernisation. I. Characterisation of the district and analysis of water delivery records, 42 (2000) 313
A case study for irrigation modernisation: II. Scenario analysis, 42 (2000) 335

Moisture sensor
Irrigation automation based on soil electrical conductivity and leaf temperature, 45 (2000) 145

Multidisciplinary measuring
The Weiherbach data set:. An experimental data set for pesticide model testing on the field scale, 44 (2000) 43

Multi-objective
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

Net return
Response of six vegetable crops to irrigation schedules, 45 (2000) 331

Nitrate
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111

Nitrogen leaching
Gleams model application on a heavy clay soil in Finland, 43 (2000) 285

Non-point source pollution
Calibration and validation of a non-point source pollution model, 45 (2000) 17
Integrated water management: emerging issues and challenges, 45 (2000) 217

Number of irrigations
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111

Nutrition
Nutritional water productivity and diets, 45 (2000) 275

Offtake
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

On-demand
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51

On-farm experiments
Water management for rice cultivation on acid sulphate soils in the Plain of Reeds, Vietnam, 46 (2000) 91

On-request
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51

Operation
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

Optimization
Using the IRMOS model for diagnostic analysis and performance enhancement of the Rio Cobre Irrigation Scheme, Jamaica, 45 (2000) 185
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243

Paddy rice
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239

Parameter estimation
Application of pesticide simulation models to the Vredepeel dataset. I. Water, solute and heat transport, 44 (2000) 105

Pecan orchard
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143

PELMO
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263

Penman equation
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157

Penman evaporation
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Penman–Monteith
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Penman–Monteith equation
Modelling surface resistance from climatic variables? 42 (2000) 371

Percolation
Lysimeter experiments with metolachlor in Tor Mancina (Italy), 44 (2000) 63
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135

Perennial vegetation
Importance of water consumption by perennial vegetation in irrigated areas of the humid tropics: evidence from Sri Lanka, 46 (2001) 215

Performance
Using the IRMOS model for diagnostic analysis and performance enhancement of the Rio Cobre Irrigation Scheme, Jamaica, 45 (2000) 185

Perturbation
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

Pesticides
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21
Lysimeter experiments with metolachlor in Tor Mancina (Italy), 44 (2000) 63
Application of pesticide leaching models to the Vredepeel dataset. II Pesticide fate, 44 (2000) 119
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135
Sources of error in model predictions of pesticide leaching: a case study using the MACRO model, 44 (2000) 247
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263
Modeller subjectivity in estimating pesticide parameters for leaching models using the same laboratory data set, 44 (2000) 389

Pesticide leaching
Impact of irrigation scheduling practices on pesticide leaching at a regional level, 43 (2000) 311
The Weiherbach data set:. An experimental data set for pesticide model testing on the field scale, 44 (2000) 43
Evaluating pesticide leaching models: the Brimstone Farm dataset, 44 (2000) 75
Application of pesticide simulation models to the Vredepeel dataset. I. Water, solute and heat transport, 44 (2000) 105
Simulation of soil water, bromide and pesticide behaviour in soil with the GLEAMS model, 44 (2000) 201
Testing PESTLA using two modellers for bentazone and ethoprophos in a sandy soil, 44 (2000) 283
Simulation of pesticide leaching at Vredepeel and Brimstone farm using the macropore model PLM, 44 (2000) 307

Pesticide leaching modelling
A European test of pesticide-leaching models: methodology and major recommendations, 44 (2000) 1
CRACK-NP: a pesticide leaching model for cracking clay soils, 44 (2000) 183
Simulation of water and solute transport in field soils with the LEACHP model, 44 (2000) 225
Evaluation of pesticide dynamics of the WAVE-model, 44 (1999) 371

Phosphorus loss
Gleams model application on a heavy clay soil in Finland, 43 (2000) 285

Pipe drainage
Analysis of DRAINMOD performances with different detail of soil input data in the Veneto region of Italy, 42 (2000) 259

PLM
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85

Pollution of ground water
Agricultural practices, soil fertility management modes and resultant nitrogen leaching rates under semi-arid conditions, 42 (1999) 81

Populations
Integrated water management: emerging issues and challenges, 45 (2000) 217

Potato
A comparison of soil-water distribution under ridge and bed cultivated potatoes, 42 (1999) 189
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99
Effect of initial soil salinity and subirrigation water salinity on potato tuber yield and size, 46 (2001) 231

Potential evapotranspiration
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157

Prairie
Simulation of soil moisture content of a prairie field with SWAP93, 43 (2000) 139

Prediction
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203

Predictive errors
Sources of error in model predictions of pesticide leaching: a case study using the MACRO model, 44 (2000) 247

Preferential flow
Simulation of pesticide leaching at Vredepeel and Brimstone farm using the macropore model PLM, 44 (2000) 307

Preferential transport
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85

Principal components analysis
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Profile moisture
Comparative evaluation of three-crop growth models for the simulation of soil water balance in oilseed Brassica, 42 (1999) 29

PRZM-2
Modelling ethoprophos and bentazone fate in a sandy humic soil with primary pesticide fate model PRZM-2, 44 (2000) 317

Rainfall-runoff
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111

Rainfall-runoff modeling
Calibration and validation of a non-point source pollution model, 45 (2000) 17

Rain-fed agriculture
Rainfall harvesting using sand ditches in Jordan, 46 (2000) 183

Rainwater harvesting
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Recharge control
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 1. Experiments and model calibration, 42 (1999) 219

Reference crop evapotranspiration
Estimation of crop water requirements in arid region using Penman–Monteith equation with derived crop coefficients: a case study on Acala cotton in Sudan Gezira irrigated scheme, 45 (2000) 203

Reference ET
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41

Regulator
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

Remote sensing
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Reservoir release
Modeling water balance components and irrigation efficiencies in relation to water requirements for double-cropping systems, 46 (2000) 167

Residual soil moisture
Effect of deficit irrigation on wheat and opportunities of growing wheat on residual soil moisture in southeast Zimbabwe, 46 (2000) 111

Resource partitioning
Characterisation of hydrogen isotope profiles in an agroforestry system: implications for tracing water sources of trees, 45 (2000) 229

Rice
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41

Rice cultivation
Soil and water indicators for optimal practices when reclaiming acid sulphate soils in the Plain of Reeds, Viet Nam, 45 (2000) 127

Ridge cultivation
A comparison of soil-water distribution under ridge and bed cultivated potatoes, 42 (1999) 189

Ridge tillage
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Risk assessment
A European test of pesticide-leaching models: methodology and major recommendations, 44 (2000) 1
Simulation of water and solute transport in field soils with the LEACHP model, 44 (2000) 225

Rivers
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Root zone
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 2. Recharge control by agronomic practices, 42 (1999) 237

Rotational water distribution
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

SADC
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Sahalian environment
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. I. Grain yield and yield components, 46 (2000) 1

Saline water
Water balance in a young almond orchard under drip irrigation with water of low quality, 43 (2000) 75

Salinity
Impacts of gypsum and winter cover crops on soil physical properties and crop productivity when irrigated with saline water, 45 (2000) 55
Salt distribution in the Senegal middle valley. Analysis of a saline structure on planned irrigation schemes from N'Galenka creek, 46 (2001) 201

Salinity countermeasures
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239

Salts
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143

Sand ditch
Rainfall harvesting using sand ditches in Jordan, 46 (2000) 183

Saturated hydraulic conductivity
A geostatistical approach to optimize the determination of saturated hydraulic conductivity for large-scale subsurface drainage design in Egypt, 42 (2000) 291

Sediment yield
Calibration and validation of a non-point source pollution model, 45 (2000) 17

Semi-arid regions
Evaporation losses from bare soils as influenced by cultivation techniques in semi-arid regions, 42 (2000) 355

Senegal
Salt distribution in the Senegal middle valley. Analysis of a saline structure on planned irrigation schemes from N'Galenka creek, 46 (2001) 201

Sensitivity
Aggregated hydraulic sensitivity indicators for irrigation system behavior, 43 (2000) 151

Shallow ground water
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Shoot and root growth
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. II. Shoot growth, nitrogen uptake and water extraction, 46 (2000) 15

Siltation
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111

SIMULAT
Comparison of the performance of pesticide-leaching models on a cracking clay soil: results using the Brimstone Farm dataset, 44 (2000) 85
Modeling pesticide dynamics of four different sites using the model system SIMULAT, 44 (2000) 337

Simulation
A case study for irrigation modernisation: II. Scenario analysis, 42 (2000) 335
Impact of irrigation scheduling practices on pesticide leaching at a regional level, 43 (2000) 311
Decision support for irrigation project planning using a genetic algorithm, 45 (2000) 243
Assessment of a crop growth-water balance model for predicting maize growth and yield in a subtropical environment, 46 (2000) 157

Simulation models
Lysimeter experiments with metolachlor in Tor Mancina (Italy), 44 (2000) 63
Comparing and evaluating pesticide leaching models: results for the Tor Mancina data set (Italy), 44 (2000) 135
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153
Simulation of soil water, bromide and pesticide behaviour in soil with the GLEAMS model, 44 (2000) 201
Modeling pesticide dynamics of four different sites using the model system SIMULAT, 44 (2000) 337

Slurries
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Small earthen dams
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111

Soil
Movement of water, bromide and the pesticides ethoprophos and bentazone in a sandy soil: the Vredepeel data set, 44 (2000) 21
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153

Soil degradation
Impacts of gypsum and winter cover crops on soil physical properties and crop productivity when irrigated with saline water, 45 (2000) 55

Soil drying
Alternate furrow irrigation for maize production in an arid area, 45 (2000) 267

Soil evaporation
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157
The influence of early sowing of wheat and lupin crops on evapotranspiration and evaporation from the soil surface in a Mediterranean climate, 42 (1999) 205

Soil hydraulic properties
Analysis of DRAINMOD performances with different detail of soil input data in the Veneto region of Italy, 42 (2000) 259

Soil moisture content
Simulation of soil moisture content of a prairie field with SWAP93, 43 (2000) 139

Soil salinity
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Soil solution salinity
Effect of initial soil salinity and subirrigation water salinity on potato tuber yield and size, 46 (2001) 231

Soil water
Temporal and spatial soil water management: a case study in the Heilonggang region, PR China, 42 (1999) 173
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Soil water adjustment coefficient
Estimation of maize evapotranspiration under water deficits in a semiarid region, 43 (2000) 1

Soil water balance
Development and testing of an irrigation scheduling model, 46 (2000) 121

Soil water suction
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317

Soil-water storage
Partitioning soil-water losses in different plant populations of dry-land corn, 42 (1999) 157

Solute transport
Simulation of soil water, bromide and pesticide behaviour in soil with the GLEAMS model, 44 (2000) 201
Evaluation of pesticide dynamics of the WAVE-model, 44 (1999) 371
Solute transport in cinnamon soil: measurement and simulation using stochastic models, 46 (2000) 43

Solute transport in soil
The Weiherbach data set:. An experimental data set for pesticide model testing on the field scale, 44 (2000) 43

Soybean
Soil water and temperature regimes in drip and sprinkler irrigation, and implications to soybean emergence, 43 (2000) 15
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Spatial temporal distribution
Soil water and temperature regimes in drip and sprinkler irrigation, and implications to soybean emergence, 43 (2000) 15

Spatial variability
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143
A geostatistical approach to optimize the determination of saturated hydraulic conductivity for large-scale subsurface drainage design in Egypt, 42 (2000) 291
Water use in a modified summer fallow system on semiarid northern Great Plains, 43 (2000) 345

Spray evaporation
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263

Springs
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Sprinkler
Soil water and temperature regimes in drip and sprinkler irrigation, and implications to soybean emergence, 43 (2000) 15

Sprinkler irrigation
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263
Digital image processing for determining drop sizes from irrigation spray nozzles, 45 (2000) 159
Response of six vegetable crops to irrigation schedules, 45 (2000) 331

Stable isotopes
Characterisation of hydrogen isotope profiles in an agroforestry system: implications for tracing water sources of trees, 45 (2000) 229

Stochastic model
Solute transport in cinnamon soil: measurement and simulation using stochastic models, 46 (2000) 43

Stochastic simulation
A furrow irrigation model to improve irrigation practices in the Gharb valley of Morocco, 42 (1999) 65

Stomatal conductance
Estimation of maize evapotranspiration under water deficits in a semiarid region, 43 (2000) 1

Stony soils
Evaporation losses from bare soils as influenced by cultivation techniques in semi-arid regions, 42 (2000) 355

Strategies
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51

Subirrigation
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111
Influence of water table management on corn and soybean yields, 46 (2000) 73
Effect of initial soil salinity and subirrigation water salinity on potato tuber yield and size, 46 (2001) 231

Subjectivity
Modeller subjectivity in estimating pesticide parameters for leaching models using the same laboratory data set, 44 (2000) 389

Subsistence farmers
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Subsurface drainage
A geostatistical approach to optimize the determination of saturated hydraulic conductivity for large-scale subsurface drainage design in Egypt, 42 (2000) 291
Soil salinization in the Nile Delta and related policy issues in Egypt, 43 (2000) 239
An analytical solution for bi-level drainage design in the presence of evapotranspiration, 45 (2000) 169
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55

Subsurface drip irrigation
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Sugarbeet
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Sugarbeet production
Assessment of drip and flood irrigation on water and fertilizer use efficiencies for sugarbeets, 46 (2001) 241

Sunflower
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99
Determination of evapotranspiration and crop coefficients of rice and sunflower with lysimeter, 45 (2000) 41

Surface
A case study for irrigation modernisation. I. Characterisation of the district and analysis of water delivery records, 42 (2000) 313
A case study for irrigation modernisation: II. Scenario analysis, 42 (2000) 335

Surface resistance
Modelling surface resistance from climatic variables? 42 (2000) 371

Surface runoff
Gleams model application on a heavy clay soil in Finland, 43 (2000) 285
Calibration and validation of a non-point source pollution model, 45 (2000) 17

SWAP93
Simulation of soil moisture content of a prairie field with SWAP93, 43 (2000) 139

SWASIM
Comparative evaluation of three-crop growth models for the simulation of soil water balance in oilseed Brassica, 42 (1999) 29

Sweet corn
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1

Temporal and spatial management
Temporal and spatial soil water management: a case study in the Heilonggang region, PR China, 42 (1999) 173

Temporal variability
Soil and water indicators for optimal practices when reclaiming acid sulphate soils in the Plain of Reeds, Viet Nam, 45 (2000) 127

Tied-ridges
Effect of tied-ridging on soil water status of a maize crop under Malawi conditions, 45 (2000) 101

Tile drainage
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111

Timeliness and Operational convenience
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

Tomato
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Topsoils treated with olive mill effluent
Evaporation losses from bare soils as influenced by cultivation techniques in semi-arid regions, 42 (2000) 355

Tracer
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153

Transient flow
Comment on the paper "An analytical solution for design of bi-level drainage systems" by A.K. Verma, S.K. Gupta, K.K. Singh, H.S. Chauhan, 46 (2000) 193

Underground storage
Integrated water management: emerging issues and challenges, 45 (2000) 217

Users
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51

Validation
Comparison of pesticide leaching models: results using the Weiherbach data set, 44 (2000) 153
Comparing and evaluating pesticide leaching models. Results of simulations with PELMO, 44 (2000) 263
Modeling pesticide dynamics of four different sites using the model system SIMULAT, 44 (2000) 337
Evaluation of pesticide dynamics of the WAVE-model, 44 (1999) 371

Variability
Water management for rice cultivation on acid sulphate soils in the Plain of Reeds, Vietnam, 46 (2000) 91

VARLEACH
Modelling pesticide leaching in a sandy soil with the VARLEACH model, 44 (2000) 357

Vegetable crops
Response of six vegetable crops to irrigation schedules, 45 (2000) 331

Veneto region
Analysis of DRAINMOD performances with different detail of soil input data in the Veneto region of Italy, 42 (2000) 259

Viet Nam
Soil and water indicators for optimal practices when reclaiming acid sulphate soils in the Plain of Reeds, Viet Nam, 45 (2000) 127

Vietnam
Water management for rice cultivation on acid sulphate soils in the Plain of Reeds, Vietnam, 46 (2000) 91

Virtual water
Integrated water management: emerging issues and challenges, 45 (2000) 217

Wastewater
Spatial variability of solutes in a pecan orchard surface-irrigated with untreated effluents in the upper Rio Grande River basin, 42 (1999) 143

Water balance
Estimating episodic recharge under different crop/pasture rotations in the Mallee region. Part 1. Experiments and model calibration, 42 (1999) 219
Water balance in a young almond orchard under drip irrigation with water of low quality, 43 (2000) 75
Distributed agro-hydrological modeling of an irrigation system in western Turkey, 43 (2000) 183
Importance of water consumption by perennial vegetation in irrigated areas of the humid tropics: evidence from Sri Lanka, 46 (2001) 215

Water balance model
Modeling water balance components and irrigation efficiencies in relation to water requirements for double-cropping systems, 46 (2000) 167

Water deficit
Estimation of maize evapotranspiration under water deficits in a semiarid region, 43 (2000) 1
Crop water requirements model tested for crops grown in Greece, 45 (2000) 297

Water demand
Predicting and mapping the future demand for irrigation water in England and Wales, 43 (2000) 203

Water duty
A new planning model for canal scheduling of rotational irrigation, 43 (2000) 327

Water extraction pattern
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. II. Shoot growth, nitrogen uptake and water extraction, 46 (2000) 15

Water extraction rate
Simulation of soil moisture content of a prairie field with SWAP93, 43 (2000) 139

Water harvesting
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111
Rainfall harvesting using sand ditches in Jordan, 46 (2000) 183

Water issues
Integrated water management: emerging issues and challenges, 45 (2000) 217

Water logging
Reclaiming salt-affected land through drainage in Haryana, India: a financial analysis, 46 (2000) 55
Groundwater management for Lower Indus Basin, 42 (2000) 273

Water loss
Some hydrological parameters for the design and operation of small earthen dams in lower Shiwaliks of northern India, 42 (1999) 111
Groundwater management for Lower Indus Basin, 42 (2000) 273
Assessment of a crop growth-water balance model for predicting maize growth and yield in a subtropical environment, 46 (2000) 157

Water management
An econometric irrigated crop allocation model for analyzing the impact of water restriction policies, 42 (1999) 47
A cost recovery model for tertiary canal improvement projects, with an example from Egypt, 43 (2000) 29
Water management for rice cultivation on acid sulphate soils in the Plain of Reeds, Vietnam, 46 (2000) 91

Water production functions
Computing the crop water production function for onion, 46 (2000) 29

Water productivity
Nutritional water productivity and diets, 45 (2000) 275

Water requirements
Nutritional water productivity and diets, 45 (2000) 275
Modeling water balance components and irrigation efficiencies in relation to water requirements for double-cropping systems, 46 (2000) 167

Water resources management
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Water reuse
Integrated water management: emerging issues and challenges, 45 (2000) 217

Water rights
Strategies for water management in gravity sprinkle irrigation systems, 43 (2000) 51
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137

Water saving
Economic weeding method for irrigated rice production in Bangladesh, 46 (2001) 267

Water stress day index
Salt tolerance classification of crops according to soil salinity and to water stress day index, 43 (2000) 99

Water table
Influence of water table management on corn and soybean yields, 46 (2000) 73
Comment on the paper "An analytical solution for design of bi-level drainage systems" by A.K. Verma, S.K. Gupta, K.K. Singh, H.S. Chauhan, 46 (2000) 193

Water table management
Modeling and testing of the effect of tillage, cropping and water management practices on nitrate leaching in clay loam soil, 43 (2000) 111

Water transport
Simulation of soil water, bromide and pesticide behaviour in soil with the GLEAMS model, 44 (2000) 201

Water use
Characterisation of hydrogen isotope profiles in an agroforestry system: implications for tracing water sources of trees, 45 (2000) 229
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. I. Grain yield and yield components, 46 (2000) 1
Assessment of drip and flood irrigation on water and fertilizer use efficiencies for sugarbeets, 46 (2001) 241

Water use efficiency
Subsurface drip irrigation of row crops: a review of 15 years of research at the Water Management Research Laboratory, 42 (1999) 1
Temporal and spatial soil water management: a case study in the Heilonggang region, PR China, 42 (1999) 173
Water use in a modified summer fallow system on semiarid northern Great Plains, 43 (2000) 345
Alternate furrow irrigation for maize production in an arid area, 45 (2000) 267
Effects of furrow irrigation methods, mulching and soil water suction on the growth, yield and water use efficiency of tomato in the Nigerian Savanna, 45 (2000) 317
Deficit irrigation and nitrogen effects on maize in a Sahelian environment. I. Grain yield and yield components, 46 (2000) 1
Remote sensing for irrigated agriculture: examples from research and possible applications, 46 (2000) 137
Comparison of sprinkler, trickle and furrow irrigation efficiencies for onion production, 46 (2001) 253

Weed control
Economic weeding method for irrigated rice production in Bangladesh, 46 (2001) 267

Wells
Factor analysis for the study of water resources contamination due to the use of livestock slurries as fertilizer, 45 (2000) 1

Wheat
Effect of deficit irrigation on wheat and opportunities of growing wheat on residual soil moisture in southeast Zimbabwe, 46 (2000) 111

Wind drift
Modelling evaporation and drift losses in irrigation with medium size impact sprinklers under semi-arid conditions, 43 (2000) 263

yield increase
Influence of water table management on corn and soybean yields, 46 (2000) 73

Yield stability
Effect of deficit irrigation on wheat and opportunities of growing wheat on residual soil moisture in southeast Zimbabwe, 46 (2000) 111

***Zea mays* L.**
Influence of water table management on corn and soybean yields, 46 (2000) 73
